Personal Statement

I am a creative, self-directed technology enthusiast with a background in hospitality management and a Distinction in Creative Media Production. I build and refine games, websites and software concepts using Claude, Codex and other AI-assisted workflows, combining creative direction with hands-on testing, troubleshooting and continuous improvement.

My strengths lie in turning ideas into working prototypes, identifying and reproducing issues, improving user experience and managing projects from concept through iteration. While I rely on AI for writing complex code, I take ownership of testing, evaluating and directing the results. I am seeking a remote role in game QA, creative technology, AI-assisted production or digital product testing.

Key Skills

- AI-assisted development and prototyping using Claude and Codex
- Manual game/software testing, bug reproduction and regression checks
- Unity game prototyping, mobile gameplay and performance evaluation
- UI/UX critique, visual direction and digital content creation
- Website development, branding and creative media production
- Product ideation, troubleshooting and iterative improvement
- Team leadership, training and stakeholder communication
- Organisation, prioritisation and quality assurance under pressure

Independent Projects

Java-based multiplayer RPG and game systems project — AI-assisted work on combat mechanics, interfaces, NPC previews, multiplayer experiments and creative building tools; extensive hands-on bug investigation and regression testing.

3D Unity mobile adventure — Stylised woodland environments, creature encounters, animation, mobile controls, camera systems and performance testing on PC and iPhone.

2D Pokémon-inspired RPG — Character movement, combat, enemies, world interactions and gameplay refinement.

Other digital and creative projects — Hospitality operations tools, iOS app concepts, sports prediction tools, portfolio website, music, branding and fantasy writing.

Employment History (All references are available upon request)

Rockwater, Hove — Assistant Manager (April 2026 – Present)
